SECTION 3: HEALTH HAZARD IDENTIFICATION DATA:

MOST IMPORTANT HAZARDS: Irritating to eyes, respiratory system and skin. Harmful if swallowed. May cause pain, nausea, vomiting and diarrhea. Contact with soft metals such as aluminum can create hydrogen gas, which is explosive.

ROUTES OF ENTRY: Eyes; Yes Skin; Yes Inhalation; Yes Ingestion; Yes

POTENTIAL HEALTH EFFECTS:

EYE CONTACT: Can causes severe eye irritation, even burns or permanent eye damage with repeated exposures.

SKIN CONTACT: Can cause skin irritation. Prolonged contact may cause dermatitis.

INHALATION: Exposure to or breathing of mists generated from this material causes irritation of the respiratory tract. May result in coughing, difficulty breathing and sore throat.

INGESTION: Harmful if swallowed. May cause pain, nausea, vomiting, diarrhea, weakness and fatigue.

CARCINOGENICITY: NTP; No IARC; No OSHA; No ACGIH: No

CONDITIONS AGGRAVATED BY EXPOSURE: May aggravate existing respiratory and/or skin ailments.

SECTION 4: EMERGENCY & FIRST AID PROCEDURES:

EYE CONTACT: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Hold eyelids open while flushing. If irritation persists, call a physician.

SKIN CONTACT: Wash skin with soap and water. If irritation persists, get medical attention. Launder contaminated clothing before reuse.

SECTION 4: EMERGENCY & FIRST AID PROCEDURES (Cont.):

INHALATION: Move person to fresh air. Aid in breathing, if necessary, and get immediate medical attention.

INGESTION: If person is conscious and able to swallow, give large amounts of water to dilute. If vomiting occurs, keep head below hips to prevent aspiration. Get medical attention immediately.

SECTION 5: FIRE FIGHTING MEASURES:

FLASH POINT: Not Applicable **AUTO IGNITION:** Not Applicable **LEL / UEL:** Not Applicable

EXTINGUISHING MEDIA: As appropriate for surrounding fire. Product will not burn. Apply water from a protected location or from a safe distance.

SPECIAL FIRE FIGHTING PROCEDURES: Positive pressure, self contained breathing apparatus. Wear full protective clothing.

UNUSUAL FIRE OR EXPLOSION HAZARDS: As any strongly acidic solution, can react with metals, especially "soft" metals, such as aluminum or zinc (galvanized), generating hydrogen. This gas is flammable and/or explosive in the presence of an ignition source.

SECTION 6: ACCIDENTAL RELEASE MEASURES:

SPILL RESPONSE: Stop flow if possible. Use appropriate protective equipment during cleanup. Soak up small spills with dry sand, clay or diatomaceous earth. Dike large spills, and cautiously dilute and neutralize with lime or soda ash, and transfer to waste water treatment system. Prevent liquid from entering sewers, waterways, or low areas. Comply with Federal, State and local regulations.

WASTE DISPOSAL METHODS: Cleaned up material may be a RCRA Hazardous Waste on disposal. Do not flush to surface water or sanitary sewer system. Comply with Federal, State and local regulations. Do not re-use empty container.

SECTION 7: HANDLING AND STORAGE:

HANDLING: Use with adequate ventilation. Engineering controls should be provided to keep concentrations below the exposure limits if applicable. Chemical Splash Goggles or full length face shield/chemical splash goggle combination to prevent to prevent contact with face and eyes. Use appropriate NIOSH/MSHA respiratory protection should heavy misting occur.

STORAGE: Keep container tightly closed and properly labeled. Loosen closures carefully. Do not use pressure to empty. Do not wash out container or use it for other purposes. Replace closure after each use. Never move drums with open bungs.

SECTION 8: EXPOSURE CONTROL / PERSONAL PROTECTION INFORMATION:

RESPIRATORY PROTECTION: Use approved respiratory protection if exposure limits are exceeded, or overexposure is likely. If respirator protection is used, follow all requirements for respiratory programs set forth in OSHA regulations (29 CFR 1910.134).

PERSONAL PROTECTIVE EQUIPMENT: Safety Glasses with side shields or splash goggles. Appropriate chemical resistant gloves should be used. Rubber apron.

VENTILATION: Local Exhaust as necessary to control PELs and TLVs while using this product.
